Congratulation Arpit & Kamal.
FYI.. this idea was demo during Penske Client visit, useful tool to capture screen shot.

Regards
Bala

Automated SnapShot Tool

Idea Implementers: Arpit Kumar Tiwari (Penske, MALS)

Problem / Issue

- Developer / tester is expected to capture screen shots for all test case results, as part of verification
- This was a repeated manual activity, which involved taking screen shots and saving them in a document
- It was a time consuming, non-value added activity

Solution

- Developed a Java-based tool that captures all images during testing in just one click and automatically saves them in a user-specified location
- It also provides a one-click option to export all the captured screen shots into a file
- The tool offers Pause and Play options while taking screen shots

- It comes with the ability to automatically clean up screenshots after export
- It also has the Undo functionality

Benefits

- Reduces manual effort by 90%
- Saves files in user configurable locations
- Captures screen shots in organized folders
- Allows exporting of files to MS Word and PPT

Contact Idea implementer(s) for re-use
