Awesome Arpit!! Excellent feedback from Douglas and team who had leveraged the tool you had developed.

Thanks,
Sathish Rajasekaran

Hi Arpit,

Congratulations on successfully adding this idea as a reusable component. But the real motivation happens when we see the responses that we receive from different people across the organization.

Came to know that we have got 60+ response for your reusable ideas mainly from managers and onsite leads who are going to evaluate and start using it for their team. Happy to know that we are making a difference at an organization level.

Hope this is a motivation for our team to come up with more ideas in 2018 which will be a very focused exercise next year.

Regards
Deepak B

Subject: Automated SnapShot Tool

Hello Arpit and team,
I am very much interested in your SnapShot tool. We have had pushback from our client that we are not performing unit testing, although my team says they have. I have asked them to include a Word doc with snapshots of their testing when they're submitting their code to be deployed from DEV to QA. Your tool would make our lives much easier.

Will you let me know how we may download and install your tool? Thanks in advance.
